Overview

The SAT results in this report present data for 2014 seniors who participated in the SAT testing program at any time during their high school years. The SAT Reasoning Test measures students' skills in critical reading (formerly called "verbal"), mathematics, and writing. The writing section was added to the test in March 2005 and scores were first reported for the class of 2006. These tests, with a score range from 200 to 800, are designed to help colleges and universities identify students for admission and to plan their educational programs to meet the needs of their incoming students.

Note: BPS 2008 mean scores were calculated as weighted means and may be slightly different from the College Board release due to rounding. Writing mean scores were first reported in 2006. Mean scores for Massachusetts and the nation in this table have been updated to reflect only the results from public schools. In reports prior to 2008 the state and national mean scores included non-public schools.

One- And Five-Year Trends

- One-year trend: BPS mean scores increased in both critical reading and math, though the gains were small, yet positive; while the state scores similarly increase slightly over one year, the national scores increased in critical reading and decreased by two points in math. In critical reading, the BPS mean score increased from 430 to 431 between 2013 and 2014. In math, the BPS mean score increased from 463 to 464 in the same period.
- The BPS average score in writing also increased, from 429 to 430, while the scores decreased at both the state and national levels.
- Five-year trend: BPS mean critical reading scores dropped five points from 436 in 2010 to 431 in 2014. Similarly, students at the state level experienced a 1-point decrease in both critical reading and math over the same period; nationally, there was a 6 point decrease in the average score for critical reading and a 10-point decrease in math. In Math, the BPS score increased one point to meet the 2010 rate, which contrasts the declines seen at the state and national trends.
